

Desert Tones Luxury Collection

Simple - Pedic[™]
Luxury Bedding and Custom Sizes - Direct from the Factory to You.[™]

Welcome To Simple-Pedic™

welcome

As you review our catalog, browse our Web site or even tour our factory, you'll notice Simple-Pedic™ is a distinctive company.

Simple-Pedic™ believes that the way a company cares for its customers is what differentiates a fantastic company from an ordinary one. It's why we take your time seriously. It's also why the entire Team at Simple-Pedic™ is empowered to help you. If you ever have a question, problem or other matter that needs attention, anyone can make the decision you need, without getting approval from a supervisor, manager or CEO.

That is real customer service.

When you communicate with The Team at Simple-Pedic™, you'll discover that these words are not just creative writing on a slick marketing presentation. Our products and customer service are the best in the business.

We don't play games ... We stand behind our words... And we back up our products with the best warranty and guarantee in the industry.

When you choose Simple-Pedic™, rest assured that you're getting not only the finest luxury and custom mattresses, but also the finest customer service in the nation.

Again, welcome to Simple-Pedic™.

Thank you from The Team at,

Dear Simple-Pedic,

Just a quick note to let you know how Christine and I felt after our first night sleeping in a Simple-Pedic bed.

Christine said she felt like a Princess. She tends to be chilly in the night, which is why we ordered the 7000 Series Warm Memory Foam Mattress. She said that she could actually feel it hugging and snuggling her. She loved it!

I slept so hard, sound and deep that I went straight past the dream state into some kind of oblivion. I felt so refreshed in the morning that I got up an hour and half earlier than I normally do. I love the bed so much, yet because it performs so well, I actually spend less time in it.

To every single team member at Simple-Pedic, we say Thank You.

*Sincerely,
Mike R.
Ashland, OR*

Luxury & Custom

Why is buying a new bed so confusing™?

For The Best Night's Rest, Choose a Simple-Pedic™ Luxury Mattress.

Would you like a more comfortable bed?

If you want to awake in the morning feeling more rested, try a luxury mattress by Simple-Pedic™.

The best mattresses on the market, Simple-Pedic™ Luxury and Custom Mattresses, were reverse-engineered with one objective in mind:

your comfort

Top caliber materials, such as a durable foam core and refined fabric, guarantee that your Simple-Pedic™ mattress provides you with the best, not just a good, night's rest.

- **Innerspring-Free Mattress**

Eliminates dipping and problematic pressure points.

- **True edge-to-edge sleeping surface**

Comfortable Euro-Tops give you more room to sleep and improve durability, unlike a traditional Pillow-Top mattress.

- **Customizable**

Warm, cool, soft, firm, any size ... Just the way you like it!

- **Dual Comfort Core™**

Simply flip the mattress to experience a firmer or softer comfort level. You get two beds in one!

- **Durable**

Lasts four to five times longer than a traditional innerspring mattress.

**Backed by the strongest 100% No-Nonsense
Warranty & Guarantee in the mattress industry.**

luxurious

If you don't agree that your Simple-Pedic™ is the best,
most luxurious mattress on the market;
we'll take it back ... Free!

Try it for 90 days!

The Truth About Foam Mattresses

truth

Most traditional mattresses are made by layering convoluted foam... the eggshell kind... over springs or foam and air cores. Layering this kind of foam creates air pockets. Over time, your mattress forms to your body and begins to “dip.” Next, the springs start to sag, causing pressure points. You lose the support necessary for a good night’s sleep.

That’s why your Simple-Pedic™ mattress is made of a High-Resilience foam core. It adds comfort and support while eliminating air pockets. There are no uncomfortable innersprings. You can customize the foam: cool, warm, firm or soft. Even better, the HR foam is more durable than conventional foam. It provides a better night’s rest, now and many years into the future.

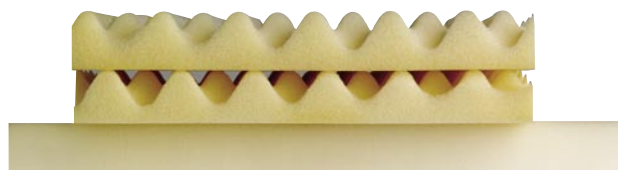

Problems with Traditional Sleep Systems

Traditional sleep systems use innerspring mattresses that fail to conform to your individual body’s needs. Each spring is connected to another spring in order to generate enough support for your body. However, this general support of your body means that some parts of your body receive less support. Meanwhile, other body parts receive increased support or pressure.

This increased pressure can cause many health-related problems. For example, poor blood circulation can be caused by the constriction of contorted joints. If less pressure exists around your knees, they will move side-to-side, rather than bend forward and backward. This creates extra pressure. Pressure causes constriction. Constriction causes swelling. Swelling causes pain. As a result, you don’t sleep well.

If you sleep on your side, a traditional mattress can cause your back to curve inappropriately for extended periods of time. Often, you can wake with neck and back pains. In addition, lack of sleep and rest causes stress or tension headaches. If your body is unable to achieve comfort due to pain, you could awaken with a headache.

Traditional innerspring mattresses layer eggshell style foam. This creates air pockets that cause the mattress to “dip” over time.

Simple-Pedic™ Luxury and Custom Mattresses use a Single or Dual Comfort™ foam core that prevents air pockets from forming.

No Dipping

Comfort and Durability!

No Innerspring. No Dips. No Sags.

Single Comfort Core™ vs. Dual Comfort Core™

Single Comfort Core™	Dual Comfort Core™
Single Comfort Core™ mattresses have a set firmness. If you know what firmness you prefer, you may want to choose one of these models. 	Ninety-eight percent of our customers prefer a Dual Comfort Core™ because it's more flexible. Two beds in one: One side is firmer, while the other is softer. If you are unsure what comfort level (firmness) you prefer, you will want to choose a model with a Dual Comfort Core™. 

Simple-Pedic™ Luxury and Custom Mattresses have either a Single Comfort Core™ or a Dual Comfort Core™.

To make your Simple-Pedic™ experience even more comfortable, you can customize many of the models. You can “split” the mattress so that one side (left) is firmer than the other (right). This is the “Split-Core” option and it’s perfect for couples that have different firmness preferences.

15-inch Thick Mattress

Another difference you’ll notice is that the stated thickness of Simple-Pedic™ mattresses refers only to the mattress, not the mattress plus the foundation. Many companies use this technique to make their products appear thicker and therefore, more comfortable. At Simple-Pedic™, we tell you the truth. Our mattresses are the best-made, most comfortable in the industry.

Simple-Pedic™ Luxury and Custom Mattresses have either a Single Comfort Core™ or a Dual Comfort Core™.

Firmness and Flexibility!

Latex Foam

When you think of latex, you probably think of rubber gloves.

However, latex is used to make many other products, including some Simple-Pedic™ Luxury and Custom Mattresses. To understand why Latex Foam is the best foam available for a mattress, you need to know a little more about latex.

Latex, sometimes referred to as Pincore, is a blend of natural (70%) and synthetic (30%) components. The highest quality Latex Foam creates optimal comfort, resilience and durability.

Made with thousands of tiny air channels that create natural ventilation, the mattress provides more breath-ability. You stay warmer in the winter and cooler in the summer.

How Is a Latex Mattress Made?

Latex is a milky fluid derived from the rubber tree. Natural latex is extracted from the tropical rubber tree in a method that is similar to tapping a maple tree for syrup.

Natural (70%) and synthetic (30%) latexes, soaps and rubber-curing agents are precisely mixed in a temperature-controlled environment. After the compound is transferred to the pressroom, it's whipped into a frothy liquid form. At this point, it has the consistency of soft-serve ice cream.

Next, a robotic arm injects the foamed liquid latex into an aluminum pin core mold. The pins create our unique, aerated cell structure, thus giving it the industry name "Pincore."

Not all Latex Foam is created equal.

Various curing agents, soaps and proteins used during the development process can cause early degradation and shorter product life span. That's why Simple-Pedic™ Latex Foam has an additional, carefully orchestrated cleaning process.

The Latex Foam is washed during a five-stage, one-of-a-kind, freshwater rinsing. Five layers of self-cleaning water jets wash away residual soaps, curing agents and proteins.

Between each jet layer, the Latex Foam is squeezed to less than four percent of its total thickness. This removes any lingering residual materials from deep within the mattress.

This vital cleansing process improves durability and comfort by removing residual soaps, curing agents and proteins. The result is a longer life span for your mattress.

Advantages of Latex Foam Mattresses

- Instantly conforms to body shape.
- Provides superior orthopedic support and pressure relief; reduces tossing and turning.
- Promotes healthy muscles by alleviating constricting pressure.
- Does not deteriorate. Mattress never needs turning or flipping and has a consistent feel from top to bottom, head to toe.

Feels Cool

Anti-microbial • Anti-bacterial
Dust mite resistant • Mildew resistant

Visco Memory Foam

The Visco Memory Foam Mattress provides the most comfortable place for you to relax by molding to your body, so that each individual part is supported just right. Made of a specially formulated polyurethane foam, the mattress changes firmness when it reacts to heat.

Visco Memory Foam molds to your body.

As body heat is applied to the Visco Memory Foam Mattress, the foam softens. It conforms to your body, so that each part receives just the right amount of support as you sleep, reducing stress on your body's pressure points. These pressure points include your shoulder blades, hips, knees and basically any joint that is normally contorted by a traditional innerspring mattress.

That's how Visco Memory Foam eliminates the localized pressure caused by traditional sleep systems. It reacts to your body's temperature, causing the foam to become softer. As it does so, the heavier points in your body sink deeper into the foam. This action equalizes the pressure along your vertical and horizontal axes, so that you get a more restful sleep.

Simple-Pedic™ uses only the finest Visco Memory Foam available on the market today.

- *Conforms to body shape*
- *Provides superior orthopedic support*
- *Reduces tossing and turning by alleviating pressure points*
- *Promotes healthy muscles by reducing constricting pressure*
- *Anti-microbial and dust mite resistant*
- *Mattresses never need turning or flipping; consistent feel from top to bottom, head to toe.*

Advantages of Visco Foam Mattresses

Memory Foam is a heat-sensitive, Visco-Elastic polyurethane foam. At room temperature, Memory Foam is firm. Within a few minutes of contact with your body heat, it softens and moulds itself around you. The foam also holds its shape temporarily. A hand pressed into Memory Foam will leave a clear impression when removed. Memory Foam is a warmer sleep surface than Latex Foam or traditional foam and will aid with poor circulation.

Because of its superior comfort, Memory Foam was used first in medical applications. It was perfect for patients that were bed-ridden or suffered from pressure sores.

Today, Visco-Elastic Memory Foam is cheaper to produce and more widely available. The most common domestic applications of Memory Foam are in mattresses, pillows and mattress toppers (mattress pads).

Visco Memory Foam
has been traditionally called:

- *Viscous-Elastic Foam*
- *Impact Foam*
- *Slow Recovery Foam*

Feels Warm

Why Is Buying A New Bed So Confusing?TM

the answer

It's true. Buying a new bed can be confusing.

We've all seen bedding brands introduce products with high profile personalities and designer names. This has nothing to do with the quality of the product. It just drives up the cost of the mattress or reduces the quality of the mattress to compensate for expensive advertising.

Today consumers have more bed choices: Air, space age Memory Foam, Memory Gel, waterbeds, Latex Foam and, of course, the traditional Innerspring. Manufacturers complicate the situation by changing fabrics, quilt patterns and labels, so it's harder to comparison shop. Where do you turn? Who can you trust? Simple-PedicTM is the only answer.

Quality does matter...

At the end of the day, quality does matter. The inside of the mattress is what's important. It's what gives you the best night's rest and the many years of comfort that you deserve.

Tips for Choosing a Quality Mattress

Look at the warranty.

Is there a lot of "fine print"?

Does the company really stand behind their product?

Simple-PedicTM does.

Look at the comfort guarantee.

Are there restrictions, such as shipping or restocking fees?

Again, does the company really stand behind their product?

Simple-PedicTM does.

Look at the construction.

Do they confuse you?

Do they make shopping simpler by using the same fabric & quilt pattern on their entire product line?

Simple-PedicTM does.

Why No Pillow-Top?

The Pillow-Top is designed primarily for appearance only. The same amount of raw materials goes into a mattress whether it is a Pillow-Top or a Plush-Top.

Originally conceived as a marketing tool, the Pillow-Top design has a more luxurious eye appeal, but does not provide true edge-to-edge support.

Savvy manufacturers and marketing personnel view the Pillow-Top as a higher profit item. Consumers will tell you that a Pillow-Top mattress feels softer; this is because softer foam is used in the top.

Simple-PedicTM does not build Pillow-Top mattresses because they do not offer any substantial enhancement to comfort or durability.

Understanding Simple-PedicTM Brand Mattress Tops

Euro-Top Mattress – Although the European Top (Euro-Top) resembles a Pillow-Top at first glance, it actually is designed to "lip" over all four sides of the mattress core. This maintains the shape and tailoring of the top for many years. In addition, it creates a larger sleeping surface and improved edge-support. Euro-Top mattresses are more expensive to produce than standard Pillow-Tops and are found only on the finest of premium beds.

Plush-Top – The Plush-Top mattress is the "traditional" mattress top. It is simply a quilted or smooth cover and normally produces a thinner mattress. It is less expensive to produce.

Before Pillow-Tops were invented, the Plush-Top came in a variety of comfort levels. Today, you will find that Plush-Tops are generally firmer than Pillow-Tops, although it is the raw material that determines the firmness (not the cover). Simple-PedicTM only builds two models in a Plush-Top: the 1000 and 3000.

Quality Matters

Why is buying a new bed so confusing?TM

Buying A New Mattress Is Simple

Choosing your Simple-Pedic™ Luxury Mattress is easy.
We've developed a Mattress Selection Chart to make it even easier.
Of course, there are a few things you will need to know in order to get started.

- **Simple-Pedic™ Luxury and Custom Mattresses are rated on a five-star scale:**

Five-star mattresses have a 20-year Warranty and 16-inch thickness.

Four-star mattresses have a 15-year Warranty and 15-inch thickness.

Three-star mattresses have a 10-year Warranty. Thickness varies.

- **Soft, Firm or Super-Firm?**

Once you determine your ideal mattress rating, decide how you want your bed to feel ...
Softer, Firmer or Super-Firm?

- **Warm Bed or Cool Bed?**

Next, decide if you prefer: warm bed (Visco Memory Foam) or cool bed (Latex Foam).

- **Size and Options?**

Chose your size and decide if you need any available options, such as a Split-Top, Split-Core, or both.

- **Pricing**

To calculate the price, you can visit Simple-Pedic™ online and simply click the appropriate mattress for more information. Before you can view prices, you need to select a size.

If you prefer, you can call our showroom at:

(877) 200-4717

and we will be happy to calculate the price for you.

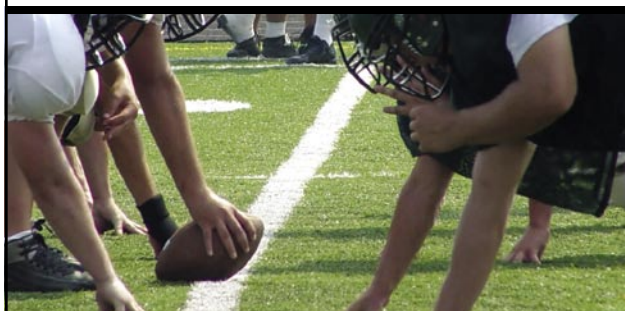

- **Free White Glove Delivery in the lower 48 states is just part of the Simple-Pedic™ experience! (Raw foam & some smaller custom mattresses ship free via UPS.)**

A Mattress For All Seasons

Whether you're an athlete searching for that extra edge, a professional looking for the best place to recharge at the end of a stressful business day, a senior needing extra comfort while you sleep, or anyone in between, Simple-Pedic™ Luxury and Custom Mattresses are what you deserve.

All you need to do is choose your size, shape, firmness and feel [warm/cool]!
Get started now at www.SimplePedic.com or call (877) 200-4717.

A GREAT GIFT FOR THE HOLIDAYS

Satisfaction Is Our Guarantee

The morning of our delivery, I received a phone call at 10:30 a.m. to inform me that I would receive my new Simple-Pedic mattress and foundation before 5:00 p.m. It arrived at about 4:45 p.m. The delivery team followed the instructions to the letter! After unboxing the mattress and foundation, they set it up in my bedroom. They even took the trash away...This couldn't have been a more enjoyable experience.

After sleeping on the Series 9000 Firm Summer/Winter Mattress for more than a month, I can tell you I have never enjoyed sleeping in a bed more. Our previous mattress was a Lady Americana, manufactured in Oklahoma City. After only five years, the springs were sticking me in the side. It was completely uncomfortable. Because the Simple-Pedic mattress is innerspring-free, I know I will never have that problem again... You can REST assured we will tell everyone we know about your fantastic mattresses!

*Best Regards,
Lee R. – Noble, OK*

*My husband and I love our new mattress!
We have slept better in the past two months on our new Simple-Pedic mattress than we have in years on our innerspring mattress...We really like the split mattress!
My husband prefers a harder mattress than I do.
Since my side has the memory foam, I am able to stay nice and warm while he stays nice and cool.
It is a great mattress that caters to each of our needs!*

*Thanks Again!
A. Waszezynski – Denver, Colorado*

I purchased a mattress and foundation set from a major brand and experienced several problems with it. Although it was under warranty, the manufacturer refused to replace it. Eventually I contacted other mattress companies for help. Tom Wacker of Best Made Mattress Company, Inc. stepped up and guided me to the manufacturer's CEO. The CEO agreed to replace the mattress and foundation set. Unfortunately, the new set was in worse condition than the original one. Once again, I contacted the company. This time they sent a representative to my home to inspect the mattress and foundation set. His comments were unnerving. He said, "The foundation was designed to sag."

Based upon the manufacturer's poor service and product quality, I will never purchase from them again. Instead, I am purchasing a mattress and foundation from Simple-Pedic. Tom was without a doubt the most helpful and concerning individual to whom I've spoken. He had nothing to gain by helping me, yet took the time to do so without hesitation. If that is the way that Best Made Mattress Company, Inc. and Simple-Pedic conduct business, it would be hard not to purchase their products. You know that you will get the service and courtesy that you deserve.

Dianna E. – Warwick, Rhode Island

Satisfaction

Start to Finish

The Strongest Warranty & Guarantee In The Industry

Please take your time adjusting to your new Simple-Pedic™ Luxury Mattress. After all, it's backed by a 100% No-Nonsense Comfort Guarantee. It's a fact that people who have been sleeping on an inferior mattress may experience minor pain as their back adjusts to its correct form. So take your time. If you're not completely satisfied within 90 days, just call us.

The 100% No-Nonsense Comfort Guarantee

If you are not completely satisfied with any of our products, simply call **(877) 200-4717** or contact us online at **www.SimplePedic.com** during the first 90 days of ownership. (Please note, raw foam purchases have a 10-day comfort guarantee.)

We will pick up the bed or exchange it for another; your choice. In cases of exchange, you will need to pay the difference for higher priced items. For exchanges to a lower-priced item, the difference will be refunded.

If you prefer to return the bed, it is no problem. We will pick-up the bed within six working days and refund all of your money. There are no restocking fees, no hidden fees, no shipping fees ... No tricks.

The 100% No-Nonsense Warranty

During the expected life cycle of the product (the warranty period) you purchased from Simple-Pedic™, (A Best Made Mattress Company, Inc., brand name) you, as the original purchaser, are entitled to a repair or replacement, no questions asked.

Simply go to **www.SimplePedic.com** or call **(877) 200-4717** during the warranty period and we will replace or repair the product, your choice. If you purchased a mattress and foundation set, we may have to replace the whole set if the fabric changes so that you still have a matching set.

Warranty Terms:

- 10-Year, Non-prorated Warranty: 1000, 2000 and 3000 Series
- 15-Year, Non-prorated Warranty: 4000 and 5000 Series
- 20-Year, Non-prorated Warranty: 6000, 7000, 8000 and 9000 Series

- No money out of your pocket
- No hidden fees
- No shipping charges
- Never prorated

No-Nonsense

Custom Size Guide

Custom

Do you have an antique or custom-made bed? Is it extra-long, extra-wide or an odd shape?

Simple-Pedic™ can design a truly spectacular custom mattress and foundation for you.

Simply choose the mattress you would like and then follow these simple guidelines to determine your measurements.

Any Length

Any Width

Any size, any shape, any type!

How do I calculate the thickness?

Simple-Pedic™ Custom Mattresses are designed to provide maximum comfort. In order to maintain the integrity and comfort of the mattresses, the thickness cannot be reduced more than five inches. In addition, Dual Comfort Core™ mattresses must be at least 10 inches thick. For example, the 1000 Series is 15 inches thick; therefore, the thinnest you can build your custom 1000 Series mattress is 10 inches.

If you need to maintain a specific height, it is best to reduce the total height by having a thinner custom foundation built. The custom, all-wood foundations can be as thin as three inches, or as thick as you would like. If you need a thinner mattress, you can order foam by the piece. Just call our sales team **(877) 200-4717**. They will design a bed that meets your specific requirements at no additional charge.

Choose Your Thickness
Minimum of 10 inches

You choose the height, width and length.

Do I Need a Special Support System?

Simple-Pedic™ Custom Mattresses and Foundations are luxury products, built with only premium materials. You must have a strong support system to protect them. Otherwise, your mattress set will sag over time.

Beds 55-inches or less in width will need several wood slats running left to right. Beds wider than 55 inches will also need a center leg that firmly touches the floor. Wood slats should be spaced 6 inches apart.

When measuring the width of wood slats, leave a little room ($\frac{1}{4}$ -inch) so they will not need to be trimmed. If you have a headboard/footboard set, take a couple of measurements: one at the top, one in the middle and one at the end of the bed (there may be some variation). If you would like us to cut the slats for you, add a note to your order. We will do it at no additional charge.

Can you accommodate special corners & odd shapes?

Special cut corners or odd shapes are no problem. We'll even do these for you at no extra charge. Some corner cuts and odd shapes we can discuss by phone. However, we may need a template so we can get it right. Once we receive your template, your custom Simple-Pedic™ will ship within 6 business days.

How long will it take to build?

Once your complete order is received, your order will ship within 6 business days.

How do I determine the cost?

You can use the calculator at www.SimplePedic.com. Simply choose the correct mattress series and enter your measurements. When entering the size of your custom design, simply enter the dimensions as if it were a traditional rectangle configuration to get your price.

Of course, you can always call us at **(877) 200-4717**. We'll be happy to calculate the price for you.

Tips For Calculating Mattress Thickness

1. Keep measurements to whole numbers, rather than fractions of an inch. Mattress measurements are close, but not as accurate as cut lumber.

2. Always measure from the slats up to where you want the mattress to end.

For example, if you have an antique headboard/footboard with custom carving, you would not want the mattress to cover it. Therefore, you would want your mattress to end at least $\frac{1}{2}$ -inch before the carving starts.

3. When measuring the width and length, leave $\frac{1}{2}$ -inch of space on each side so that your comforter, sheets, etc., will fit.

4. Reduce the thickness of the foundation before you decide to reduce the thickness of the mattress.

*We call and confirm all custom orders,
so we get it right the first time.*

Discover Perfection

adjustable

Simple-Pedic™ Adjustable Luxury Mattresses

The newest addition to our collection of luxury mattresses, Simple-Pedic™ Adjustable Luxury Mattresses are the Rolls-Royce of the bedding industry. Sleep in one just once and you'll discover they are absolute perfection!

Drift into a deep, refreshing slumber as the dual variable speed massage unit gently relieves built up muscle tension. Or select your favorite preset position with just one touch of your cordless backlit remote and relax in comfort at the end of a long day.

The Simple-Pedic™ Adjustable Luxury Mattress is available in both the Winter / Summer 8000 (Soft) and 9000 (Firm) Series and designed with three inches of Latex Foam on one side and three inches of Visco Memory Foam on the opposite side, for a warmer feeling during winter and a cooler feeling during summer. In addition, these five-star mattresses feature headboard brackets, a fiber base and a wall-hugging, adjustable power foundation, so your nightstand is always within reach.

Key Components of Adjustable Mattresses

There are two key components that you must be concerned with before you buy an adjustable bed. One is the base; the other is the mattress. Most manufacturers and e-retailers buy the base from Leggett and Platt and resell it, which is fine. However, due to pricing pressure, most compensate for their inability to compete by reducing the quality of the mattress.

Not at Simple-Pedic™.

Our adjustable beds are only available in our five-star 8000 and 9000 Euro-Top Series – the best made mattresses in the bedding industry. This not only guarantees you the finest adjustable bed on the market, but also the same luxurious comfort of our Winter / Summer mattress.

Superior inside and out, your Simple-Pedic™ Adjustable Luxury Mattress features a luxurious box-spring appearance and is beautifully tailored with the enhanced edge support of a Euro-Top covered in American-made damask fabric. Inner spring free with a Single Comfort Core™, your mattress provides ultra-support for your joints, so you experience the best night's rest.

Fall in Love

Adjustable Beds

The Invention Of The Modern Mattress

The Wacker Management Team developed Simple-Pedic™ brand

luxury and custom mattresses and foundations with only one goal in mind... **your comfort.**

Designing the best luxury bed on the market

WMT's approach to the creation of Simple-Pedic™ brand luxury and custom mattresses was simple. Rather than build the mattresses to meet a specific price point, they used comfort, quality and durability as the design criteria.

First, WMT researched the problems associated with traditional mattresses, such as pain caused by sagging springs, pressure points, dipping and poor durability. Then they reverse-engineered the mattresses using only the finest American-made raw materials. The end result was a product that solved 98 percent of the problems associated with other brand name mattresses.

In addition, the Wacker Management Team acquired The Best Made Mattress Company, Inc., Colorado's oldest independent mattress manufacturer in 2002. As a company that prided itself on quality and offered the strongest warranty in the business, the purchase of The Best Made Mattress Company fully supported the team's philosophy and end goal. In addition, the new acquisition allowed WMT to offer the new mattresses direct from the factory, thus reducing the retail cost.
